THIS IS UNEVALUATED INFORMATION

50X1-HUM

Lubrza (Liebenau) Airfield.

- |                           |   |
|---------------------------|---|
| 1. Location               | Between Lubrza and Paklickie Lake.  |
| 2. Description            | New construction of the Soviet air force. Work was still being done at the edge of the lake, and underground tanks, said to be for the storage of 100,000 liters of fuel and 1,000 tons of munitions, were being constructed below the level of the lake.               |
| 3. Personnel              | Approximately 800 men, of whom about 300 were flying personnel.   |
| 4. Aircraft               | Although this airfield is an auxiliary one for bombers, 23 Soviet single-engined monoplanes with low wings were parked on and around the airfield. No jet aircraft were observed, but the field would be suitable for such aircraft because it has good approaches.     |
| 5. Ground                 | Levelled forest clearing and grass.   |
| 6. Meteorological station | Available.  |
| 7. Night flying           | Lantern lighting installations.   |
| 8. Billets                | For over 2,000 men, in huts.  |
| 9. Prevailing wind        | Probably north.   |
| 10. Fuel                  | Kept in drums located near the workshops. There were approximately 100-150 drums of an unknown capacity. Two tank trucks were also observed; <span style="border: 1px solid black; display: inline-block; width: 150px; height: 1.2em; vertical-align: middle;"></span> |
| 11. Hangars               | There were no hangars but only dispersal bays with accommodations for approximately 60 aircraft.  |
